

Water-soluble cannabinoids are faster acting and more consistent in their behavior than other edible forms of cannabis. Ingested Water-Soluble THC, can be in full effect within 10-15 minutes on an empty stomach.

ACTIVATION TIME: 10-15 MINUTES

WATER-SOLUBLE TECHNOLOGY

CANNA-CUBE 10MG SOFT CHEWS

10MG PER PIECE | 100MG PER PACK

>> BLOOD ORANGE ROSEMARY

>> 'FIRE' RASPBERRY & LIME

CANNA-CUBE 10MG HARD MELT

10MG PER PIECE | 100MG PER PACK

>> LEMON

>> CINNAMON

From the view point of a medical patients perspective, this quick onset is extremely useful for prompt relief. Recreationally, the rapid duration can be alluring for those that have activities through out their day. The water-soluble delivery method allows for more accurate dosing.

We offer water-soluble Canna-Cubes as a soft chew and hard lozenges. The soft chews are made with real fruit puree and are 10mg of THC per piece (100mg Total per package). Currently available in Blood Orange Rosemary and Raspberry 'Fire' Lime flavors.

Our hard lozenges are 10mg of THC per piece (100mg Total per package). Currently available in Lemon or Cinnamon flavoring.
