

Infused pre-rolls have been a staple of provisioning centers across the country. Redbud Roots is excited to offer the first infused pre-roll in the Michigan licensed market with the RB Rocket.

NEW & IMPROVED

'SINGLE SOURCE' INFUSED PRE-ROLL

1G 'ROCKET' INFUSED PRE-ROLL

Starting with our 1 gram pre-roll, we utilize flower, resin, and the kief isolated from a single cultivar and pack it into a King Cone paper roll.

This creates a complex combination of resin and flower all in a single product, presenting patients with a representation of the cultivar in all forms. These potent pre-rolls are sure to provide even the most experienced patients a potent pre-roll sure to take them out of this world on our premium Rocket.
